camect **EMEA**

COMPLETE VIDEO SECURITY
ALERT CONTROL

ADD INTELLIGENCE
TO ANY SECURITY CAMERA

Camect connects to any IP cameras, so you can upgrade any system, from residential properties to warehouses, and bring cameras from multiple brands under one, easy-to-use app.

MAXIMIZE PRIVACY & BOOST RELIABILITY

Camect stores and analyzes your video locally - not in the cloud. Build a system with faster video processing, instant alerting, reduced bandwidth consumption, complete data privacy, and AI that still works when the internet is down.

TAKE CONTROL
OF SECURITY ALERTS

Focus your attention on the information you and your users need. Avoid alert fatigue and lost time with analytics that work the way you want them to.

30+ Classifications
Choose alerts for people, animals, vehicles or deliveries.

Alert Areas
Draw areas on camera feeds for Camect to focus on or ignore.

Loitering Alerts
Delay alerts until a subject has been loitering for a specified time.
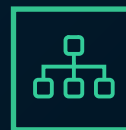

Entering & Leaving
Get specific 'Arriving' or 'Leaving' alerts for vehicles.

Enhanced AI Modes
Boost AI performance with Long Distance mode and Sensitive Mode.

Multi-AI Architecture
Get 4x more analysis of video than with conventional AI systems.

STOP FALSE ALARMS

Camect's AI has been trained to ignore common causes of false alarms, such as bugs, cobwebs, rain and snow, without reducing AI sensitivity.

99%
ACCURACY

STREAM, SEARCH & SHARE WITH EASE

Camect makes it easier than ever to find the events you're looking for, stream cameras on the go, and share clips or camera access with others. Get all the convenience and benefits of cloud-based AI — without the cloud.

Fast Video Search
Review your footage faster with event-based video search features.

Share Access & Clips
Easily share alert clips and camera access with anyone.

Secure-Sign-On
Enable up to 4FA for complete account security.

Snooze Alerts
Snooze your alerts with a click, or with our automatic disarm feature.
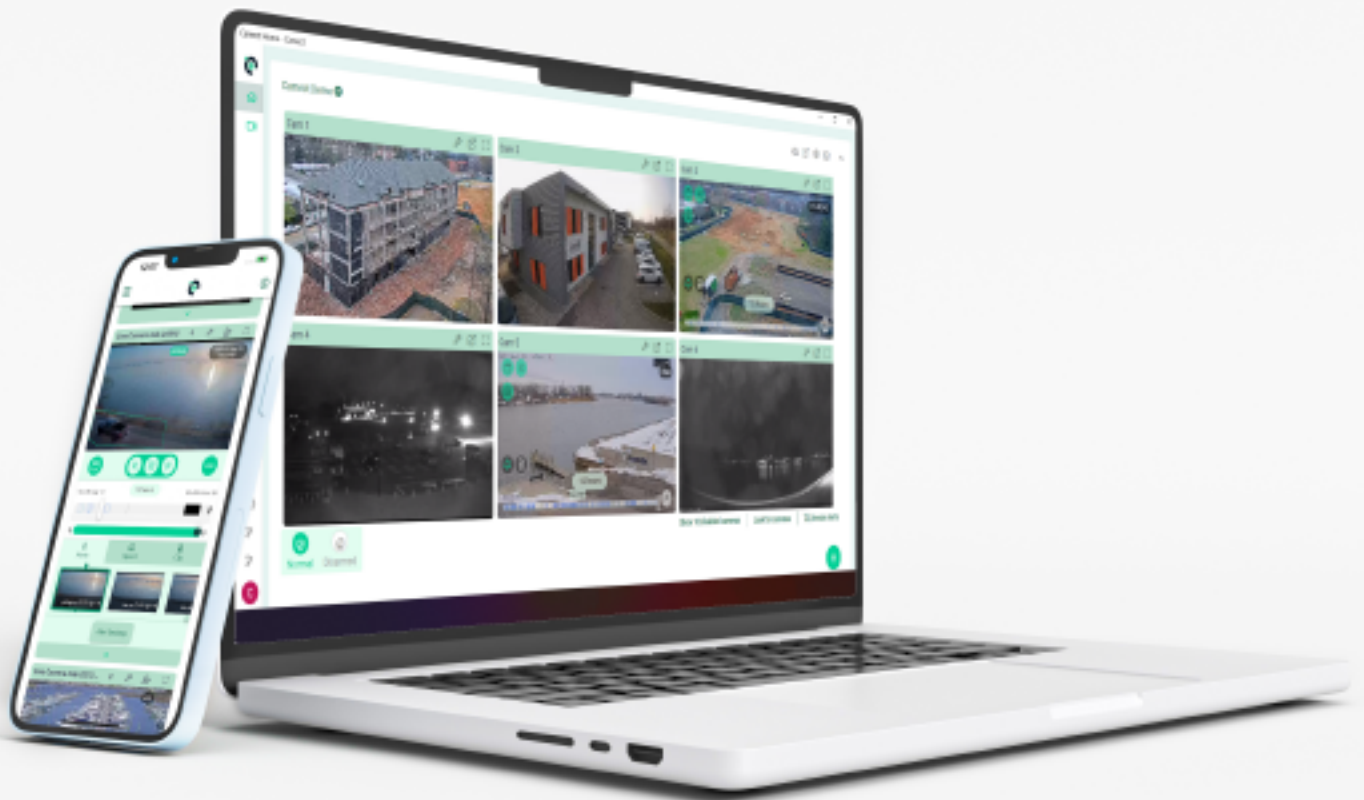

Stream Management
Minimize latency and bandwidth use with HLS stream management.

Alert Encryption
Boost security with encrypted point-to-point alerts.

PCs & Laptops

Mobiles & Tablets

Smart Speakers

Smart Watches

OPTIMIZE MONITORING OPERATIONS & EFFICIENCY

✓ Eliminate false alarms and only focus on the important events

✓ Get point-to-point alerts that do not need to relay through our cloud

✓ Cut costs by reducing the need for operators to manually review video feeds

✓ Customers can also see alerts and help resolve alarms if they choose to

20+ MONITORING INTEGRATIONS

"

Truly the most **accurate and amazing** product we have worked with.
We depend heavily on Camect and its accuracy.

SECURITY CENTRAL PROTECTION

Camect 24

Perfect for homes & SMBs

- 1TB internal storage
- 15 watts typical power consumption
- Intel architecture 4GB RAM
- Up to 24MP processing

Universal Storage

Expand your storage with enterprise class drives: 8TB mirrored Raid or 16TB JBOD configured via enclosure settings.

Camect 60

Built for business

- 2TB, 4TB or 8TB internal storage
- 40 watts typical power consumption
- Intel architecture 8GB RAM
- Up to 60MP processing

Relay Devices

Automatically trigger 3rd party devices like lights with your detections. Arm and disarm Camect with 3rd party devices.

BECOME A CERTIFIED CAMECT PARTNER

Join our partner program to become a certified Camect distributor, installer, or monitoring partner. Get access to product updates, 2nd tier technical support and pro pricing.

Upgrade Any Security System

Offer your customers a smart upgrade that doesn't require them to replace their current security cameras.

Grow Your RMR

Attract customers and retain them with AI that works, remote customer support ability, and Pro subscriptions.
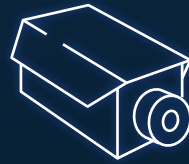

Install & Hand-Off Faster

Simply plug Camect into to a router and allow Camect to connect all cameras on the network. Cameras outside the network can be added by URL. User accounts can be created and handed-off remotely.

Backup alerts with USB,
network and cloud storage

Connect to monitoring stations,
PSIM's and leading VMS

Connect to any IP
security cameras

Get access and alerts
on all devices

Trigger lights and audio
warnings automatically

camect

Camect's industry-leading AI recognizes the objects that your cameras see and raises alerts for only the interesting events — completely eliminating false alerts from bugs, animals, leaves, rain, shadows, etc.

This technology is fully contained within affordable on-site hardware, and yet is significantly more accurate than more expensive products that rely on cloud-hosted analytics. A Camect security system will not eat up bandwidth, records continuously, and works even when the internet is down.

Camect provides simple, single way to integrate cameras of many different brands, and connect to monitoring stations and software services. A system to monitor high value assets takes only minutes to configure, complete with accurate alert notifications delivered in real-time, universal secure remote access.

At Camect, ex-Googlers, computer scientists, and security industry veterans work together to redefine the security camera experience.

Camect is headquartered in Mountain View, California, and currently has customers in over 30 countries.
